

The incredible generosity of organ donors and their families offers a gift that could save a neighbor, parent or friend.

The Bridge to Life for Millions

OneLegacy is part of a national organ donation network made up of 57 non-profit organizations that play a critical role in our healthcare system—working with hospitals, physicians, transplant centers, donor families and the community to educate about and facilitate donation to patients in need.

Organ Donation The Gift of Life

Organ donation offers a second chance at life for thousands of Americans each year. A single donor can:

Save up to **eight lives** through organ donation

Restore sight to **two people**

Save and heal up to **seventy-five lives** through tissue donation

Saving More Lives Each Year

OneLegacy has provided hope and healing to families in Southern California for more than 50 years.

OneLegacy in 2020

1,650+
Organ transplants facilitated

190K
Healed lives through eye and tissue donation

Transplanted
313 Lungs
181 Hearts
774 Kidneys
363 Livers
29 Pancreases

Marked the **Sixth** consecutive year of record-breaking increases

As the list of Americans waiting for a donation continues to grow, OneLegacy is focused on innovating to continue improving recovery rates to meet our communities' needs. Our data-driven operation is working to save more lives each year through:

Innovation

Opened California's **first-ever Transplant Recovery Center**

Rapid Response

Nearly **60 staff members** available **on-call 24/7/365**

Medical Precision

3 medical directors review 100% of referrals, each with their own designated discipline

The Complexity Behind a Match

Donation is emotionally challenging and medically very rare.

< 1% of all deaths are eligible for donation

Only **70%** of possible donors choose to donate

3 out of 8 organs from those few possible donors are healthy enough to transplant

A Critical Connector Facilitating Donation for Southern California

OneLegacy serves as the critical connector between hospitals and transplant centers for one of the largest and the most diverse regions in the nation with a service area spanning 7 Southern California counties and 20 million residents:

215 Regional Hospitals

Donation begins at the hospital where OneLegacy staff coordinates with physicians and donor families, educating and advocating around the lifesaving benefit of donation.

OneLegacy

After donation is authorized by the registered donor or by family, OneLegacy medically manages the donor to maximize transplants and matches the donor to the waiting recipient and transplant team.

11 Regional Transplant Centers

Transplant teams here and across the nation implant the gifted organ, saving thousands of lives a year.

Donation Community

OneLegacy fosters and facilitates a community for donor families providing long-term support.

Woven into the Fabric of Southern California

As the list of Americans waiting for life-saving organs and donations continues to grow, so does our mandate to increase the number of registered donors—and this work starts with education on the importance of donation. OneLegacy educates and advocates for donation in one of the most diverse regions in the country, with a 70% non-white population. Understanding that our communities' needs are specialized, OneLegacy tailors our work and outreach to effectively reach every population:

Multi-cultural competency trainings

Targeted community partnerships

Strategic public education investments

Operational adjustments—
like ensuring our team
mirrors our community

Success in Community Collaboration

OneLegacy's work mirrors our community—72% of local transplants facilitated by OneLegacy have been received by a person of color, with 49% going to Hispanic recipients.

The Faces of Donation Sharing Hope

The waiting list is diverse in both age and race—donation could save the life of a young mother undergoing dialysis, a newborn baby with a heart defect or a 75-year-old in need of a new lung after battling COVID-19.

Indra Michaca was only 17 years old when she unexpectedly fell into a coma and doctors discovered a blood clot causing liver failure—Indra was placed on the transplant list and within 24 hours, OneLegacy had found a match that saved her life.
