

National Donor Sabbath

A single donor can:

Save up to
eight lives
through organ
donation

Restore sight
to as many as
ten people

Save and heal
more than
seventy-five lives
through tissue
donation

Organ, eye and tissue donation offers each of us the hope and ability to save and heal lives, a generous act that is supported by all major religions.

Driven by a mission of hope and healing, OneLegacy, the federally designated organ procurement organization serving the seven county greater Los Angeles area, is the bridge to life for millions in Southern California and for donors and patients waiting for a lifesaving and healing transplant. During this year's Donor Sabbath, from November 12-14, OneLegacy is joining faith leaders throughout Southern California and the nation in educating our community about the critical need to increase organ donation.

We can all be a miracle to someone in need and give the gift of life. This year, join us in observing National Donor Sabbath and register to be a donor through OneLegacy. Give the gift of life today at onelegacy.org/register.
